

WHAT IS CLAIMED IS:

1. A method of investment management for managing an investment to a business to be performed by an entrepreneur
5 using an intellectual property right, comprising the steps of:

storing information about a beneficiary right in a first server computer, wherein the beneficiary right is based on the intellectual property right transferred from
10 the entrepreneur to a fund donor in exchange for funds to be provided to the business and supplied by the fund donor; and

performing an income estimation about the investment to the entrepreneur at the first server computer on the
15 basis of the information about the beneficiary right stored in the first server computer and information about proceeds of the business of the entrepreneur received from a first client computer.

20 2. The method of investment management as claimed in Claim 1, wherein

the beneficiary right includes a right to receive a royalty from the entrepreneur under a license being granted to the entrepreneur on the basis of the intellectual
25 property right being transferred to the fund donor.

3. The method of investment management as claimed in

Claim 1, further comprising the step of:

notifying to the first client computer that processes the information about the entrepreneur before the intellectual property right is transferred from the entrepreneur to the fund donor, wherein the notifying step including the steps of:

the first server computer receives an application for financing to the business of the entrepreneur from the first client computer, and

the first server computer transmits notice information chosen from two or more notice information for notifying a corresponding examination result about the application to the first client computer, wherein the two or more notice information for notifying the respective examination results is previously stored in the first server computer.

4. The method of investment management as claimed in Claim 1, wherein

the information about the proceeds of business includes information about an income to be brought from the entrepreneur.

5. The method of investment management as claimed in Claim 1, wherein

the step of performing the income estimation includes the step of calculating an estimated amount of the income

to be brought from the entrepreneur.

6. The method of investment management as claimed in Claim 1, wherein

5 the intellectual property right transferred from the entrepreneur to the fund donor is a target property of trust with the fund donor.

7. The method of investment management as claimed in Claim 1, wherein

10 the first server computer takes charge of an income obtained by means of the beneficiary right as reinvestment capital funds for another business to circulate the income.

8. The method of investment management as claimed in Claim 1, wherein

15 the information about the beneficiary right includes information about a fund that is established by the fund donor with respect to the beneficiary right on the basis of the intellectual property right transferred from the entrepreneur to the fund donor.

9. The method of investment management as claimed in Claim 1, further comprising the steps of:

25 storing sales information about a financial product in a second server computer that processes information about a financial institution that supplies the financial

product that is made from the beneficiary right transferred from the fund donor by means of processes of liquidating and securitizing an asset; and

transmitting the sales information stored in the
5 second server computer to a second client computer that processes information about an investor.

10. The method of investment management as claimed in Claim 9, further comprising the steps of:

10 receiving information on purchase application from the second client computer by the second server computer, wherein the purchase application is provided for the purchase of a financial product represented by the sales information transmitted from the second client computer
15 to the second server computer; and

transmitting reply that corresponds to the purchase application provided for the purchase of the financial product from the second server computer to the second client computer, wherein the reply is chosen from a
20 plurality of reply information by the financial institute, wherein the plurality of reply information is previously stored in the second server computer for the purchase application.

25 11. The method of investment management as claimed in Claim 9, wherein

the beneficiary right transferred from the fund donor

is a priority beneficiary right.

12. The method of investment management as claimed in Claim 9, wherein

5 the financial product is a fixed interest security.

13. The method of investment management as claimed in Claim 9,

10 wherein the beneficiary right transferred from the fund donor is an investment target property for pension fund management by the financial institution.

14. The method of investment management as claimed in one of Claims 1 to 13, wherein

15 the beneficiary right is consolidated investment beneficiary right that further includes a beneficiary right on the basis of securities with stock instrument included issued by the entrepreneur.

20 15. An investment management server for managing an investment to a business performed by an entrepreneur using an intellectual property right, comprising:

25 a storage means for storing information about a beneficiary right based on the intellectual property right transferred from the entrepreneur to a fund donor and supplied by the fund donor in exchange for funds to be provided to the business; and

10046709.011202
20270"60294001

a calculation means for performing an income estimation about the investment to the entrepreneur on the basis of the information about the beneficiary right stored in the storage means and the information about sales proceeds of the business received from a first client computer that processes information about the entrepreneur.

16. The investment management server as claimed in Claim 15, wherein

the beneficiary right is consolidated investment beneficiary right that further includes a beneficiary right on the basis of securities with stock instrument included issued by the entrepreneur.

15

17. A financial transaction server that performs a processing about a financial institution that supplies a financial product based on a beneficiary right transferred from the fund donor in accordance with Claim 15, comprising:

a storage means for storing a sales information about the financial product; and

a transmitting means for transmitting the sales information stored in the storage means to a second client computer that processes information about an investor.

18. The financial transaction server as claimed in Claim

17, wherein

the beneficiary right is consolidated investment
beneficiary right that further includes a beneficiary
right on the basis of securities with stock instrument
5 included issued by the entrepreneur.

19. An investment management system for managing an
investment to a business performed by an entrepreneur using
an intellectual property right, comprising:

10 the investment management server as claimed in Claim
15; and

the financial transaction server as claimed in Claim
17.

20. A computer-readable medium capable of configuring a
first server computer that manages an investment to a
business to be performed by an entrepreneur using an
intellectual property right to perform a method of
investment management, said method comprising the steps
20 of:

storing information about a beneficiary right in the
first server computer, wherein the beneficiary right is
based on the intellectual property right transferred from
the entrepreneur to a fund donor in exchange for funds to
25 be provided to the business and supplied by the fund donor;
and

performing an income estimation about the investment

10046709-011702
to the entrepreneur at the server computer on the basis
of the information about the beneficiary right stored in
the first server computer and information about proceeds
of the business of the entrepreneur received from a first
5 client computer.

21. The computer-readable medium as claimed in Claim 20,
wherein

the beneficiary right is consolidated investment
10 beneficiary right that further includes a beneficiary
right on the basis of securities with stock instrument
included issued by the entrepreneur.

22. A computer-readable medium capable of configuring a
15 second server computer that performs a processing about
a financial institution that supplies a financial product
based on a beneficiary right transferred from the fund
donor in accordance with Claim 20 to perform a method of
investment management, said method comprising the steps
20 of:

storing sales information about a financial product
in the second server computer; and

transmitting the sales information stored in the
second server computer to a second client computer that
25 processes information about an investor.

23. The computer-readable medium as claimed in Claim 22,

wherein

the beneficiary right is consolidated investment
beneficiary right that further includes a beneficiary
right on the basis of securities with stock instrument
5 included issued by the entrepreneur.
